TIP Project Listing.....	12

Introduction

The Transportation Improvement Program (TIP) for the Columbus Area Metropolitan Planning Organization (CAMPO) lists all transportation projects within the planning area of CAMPO that use federal transportation dollars. These dollars are, as a general rule, your federal fuel tax at work. Each time you purchase fuel, you are paying eighteen point four cents per gallon of federal fuel tax. This document shows how that money is being invested in Bartholomew County.

The TIP also lists non-federally funded transportation projects of regional significance. Examples of past non-federally funded projects of significance include the improvements to US 31 from Washington St to 10th Street. This project was state funded. The round-about at 11th and Indianapolis was funded using City of Columbus funds from the Thoroughfare Fund. The TIP has a five year horizon and is updated at a minimal on an annual basis.

Most of the projects listed in the TIP are Indiana Department of Transportation (INDOT) projects. This is because INDOT is responsible for the maintenance, operation, and expansion of the state highways and Interstates. These facilities carry very large volumes of traffic and thus require the most funding.

Local governmental entities are responsible for maintenance, operation, and expansion of the remaining portions of our road network. A portion of the federal funds that flow back to the State of Indiana are for this purpose.

Purpose

The TIP serves multiple purposes.

- 1) It is the instrument for implementing the long range transportation plans.
- 2) It is one of several tools to keep the public informed of the direction of and change to their transportation network.
- 3) It sets forth a rough schedule for local officials for coordination purposes.
- 4) It provides a financial overview, ensuring that those projects scheduled can be realistically financed.

Responsible Agency

Title 23 (Sect 450) of the Code of Federal Regulations requires that the Transportation Improvement Program be developed and updated annually under the direction of the Metropolitan Planning Organization. The Columbus Area Metropolitan Planning Organization (CAMPO) has been designated by the Governor of the State of Indiana as

the MPO for the Columbus Urbanized Area. The CAMPO planning area includes Bartholomew County. The Blue River Township of Johnson County, and the Jackson Township of Shelby County are now the responsibility of the Indianapolis MPO. This change in responsibility took place in 2010.

TIP Development Process

The CAMPO Transportation Improvement Program implements the CAMPO Transportation Plan. MPO funded projects flow from the Transportation Plan into the TIP. The CAMPO Transportation Plan covers a period of approximately twenty-five years and sequentially lists all projects to be accomplished within that time period.

The TIP is updated on a continual basis via the addition of smaller changes. Smaller changes include minor changes in project costs and timing, and the addition or deletion of INDOT projects.

The TIP receives a complete review and update on an annual basis. This is called the TIP development process, and has multiple steps. In the first step, another year is added to the timeframe of the TIP. For example if the last TIP covered the years 2012 through 2016, the new TIP will cover the years 2016 through 2019. From the twenty five year MPO Transportation Plan, MPO staff adds projects that have entered the timeframe covered by the new TIP. INDOT sends a list of its projects for inclusion in the TIP.

In the second step, MPO staff meets with all project sponsors to review project schedules and costs for MPO funded projects. Project sponsors are referred to as Local Planning Agencies (LPA). Examples of an LPA include the City of Columbus, Bartholomew County, Columbus Parks and Recreation, or Bartholomew Consolidated School Corporation. LPAs are responsible for the management of the individual projects listed in the TIP.

In the third step, MPO staff reviews INDOT sponsored projects with INDOT staff. The MPO does not have any form of budgetary authority over INDOT projects, however in accordance with federal regulations all federally funded transportation projects within the planning area of the MPO must be included in the TIP. Most INDOT projects involve the use of federal funds. The inclusion of INDOT projects in the TIP is also an important element in ensuring that INDOT and MPO projects are working towards the same regional transportation goals.

With the completion of steps one through three, the draft TIP is complete. In the fourth step, the draft TIP is then presented to all consulting parties, the public at large and the Technical Advisory Committee (TAC). Upon approval by the TAC, the draft TIP is taken to the MPO Policy Board for approval.

Once approved by the MPO Policy Board, the TIP is forwarded to INDOT and all other appropriate state and federal agencies for review. The TIP must be approved by the MPO and the Governor, and a conformity determination must be made by the FHWA and the FTA. The TIP then becomes, without modification, part of the Statewide Transportation Improvement Program (STIP).

Fiscal Constraint

The TIP must be financially constrained. In other words, the MPO budget has to be balanced; the cost of projects listed may not exceed the spending authority of the MPO. The calculation of financial constraint confines itself to those moneys and projects under control of the MPO. INDOT conducts its own budgetary planning for INDOT projects listed in the TIP.

One important factor in creating a project specific plan is estimated future revenue streams. The amount of federal funding the MPO receives varies from year to year. Factors affecting the funding level include congressional legislation (new transportation bills), variances in annual appropriation levels, and rescissions. In accordance with the INDOT / Local Federal Aid Sharing Agreement, fluctuations in federal funding levels are shared equally among all parties. Spending authority for the MPO is restricted to the period of the current congressional transportation bill. Transportation bills generally have a life of six years. Funding projections outside of this time period are estimated by MPO staff.

MPO Funding Overview

Prior to money being spent in fiscal year 2015, INDOT and CAMPO agreed on the amount of federal funds CAMPO has programmed up to July 1, 2014, but had not spent yet. The decided amount is \$7,919,314 and this balance is called the Prior Year Balance (PYB). Once this amount was agreed on, it was then allocated in FY 2016-2019. There are rows in the project listing sheets indicating where the PYB is being spent in each fiscal year.

After the PYB is spent, CAMPO is committed to spending the allocation it receives (typically about \$1,626,840) each fiscal year within that fiscal year.

Federal transportation dollars managed by the MPO are spent on an 80 / 20 basis. Eighty percent of the project costs are federal dollars, while twenty percent must be local. Prior to adding a project to the TIP, MPO staff ensures that the twenty percent local match is available.

The Federal Transit Administration also provides funding for use by ColumBUS Transit. Operational and capital costs can be covered by a number of funding sources. Funding source 5307 is an annual allocation that is the major source of funds for ColumBUS Transit. The CAMPO TIP must also be fiscally constrained with regard to transit funding. ColumBUS Transit was allocated \$795,535 for 2015, so CAMPO is making the assumption that the level of funding continues at that amount for future years. The TIP is fiscally constrained; the projects do not exceed the expected 5307 funds.

How to read the project listing

The last pages of this document are the listing of transportation projects that will be accomplished in the MPO planning area. This list contains a large amount of information in a very compact form, and must provide information to both the public and transportation officials. The following is an explanation of the columns of data from left to right:

Sponsor	This project sponsor is the entity that initiated and is managing the project.
Project / DES#	This stands for designation number and is simply a project number used to track the project in INDOT computer systems.
Work type	This explains the general category of work being performed, such as bridge repair, road reconstruction, etc.
Road/Bridge	This notes what bridge or road is being worked on.
Location	This column gives a very brief explanation of the location of the project along and sometimes includes minor details of what the project involves.
Phase	Road projects have four basic phases. The first phase is preliminary engineering (PE). During PE the physical design of the road is defined, i.e. what is being done and how will it look. The next phase is right-of-way (RW). It is during this phase that any land required for the project is identified and purchased. The next two phases take place simultaneously; these are construction (CN) and construction engineering (CE). Construction is the actual building of the road, and construction engineering (also known as construction inspection) is on-site quality assurance and monitoring of the construction process.
Program	Federal transportation dollars are divided into many different programs aimed at accomplishing different goals. This information is generally more interesting to civil servants in cubicles than it is for the general public. However, if you would like to know more, please don't hesitate to ask.
Federal	This shows the amount of the project being funded with federal dollars.

Match	This column shows the match money required to spend the federal money. This is either state or local dollars. Generally a twenty percent match is required for federal dollars. Exceptions to this do exist. Transit operating is a fifty percent match for example.
Years	This shows in what state fiscal year the money is anticipated to be spent. The state fiscal year runs from July 1 st to June 30 th .
Funding total	This column shows the total amount of funds for that line item, regardless of year it is programmed.
Year six plus costs	This column shows any costs that will be outside of the five year TIP window. In other words, projects that are programmed but will not be completed in the five year window of the TIP.
Sidewalks	This indicates whether the project will include sidewalks for pedestrians.
Bike facilities	This indicates whether the project will include some form of dedicated bike facilities such as a bike lane.

Each line item in the project listing is one phase of a project. Therefore a single project can have multiple line items. Phases of a project include preliminary engineering, right-of-way acquisition, construction, and construction inspection. A project may also consist of multiple line items in the project listing if it is funded from multiple sources.

Please feel free to contact MPO staff at 812-376-2502 with any questions.

TIP Adoption Resolution

RESOLUTION 2015 – 2

A RESOLUTION OF THE COLUMBUS AREA METROPOLITAN PLANNING ORGANIZATION POLICY BOARD ADOPTING THE TRANSPORTATION IMPROVEMENT PROGRAM FOR STATE FISCAL YEAR 2016-2019

WHEREAS, the Columbus Area Metropolitan Planning Organization is the designated Metropolitan Planning Organization and responsible for transportation planning in the City of Columbus and Bartholomew County, and

WHEREAS, the development of an annual Transportation Improvement Program, which includes local and state projects requesting U.S. Department of Transportation funding, is a requirement and part of the comprehensive planning process, and

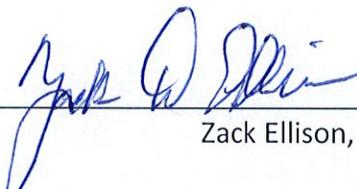

WHEREAS, staff and the Technical Advisory Committee has developed and recommended for approval the Transportation Improvement Program for State Fiscal Years 2016-2019, and

WHEREAS, the representation on the Technical Advisory Committee consists of those agencies initiating the recommended projects and have the authority to execute them, and

WHEREAS, the projects herein are adopted from and consistent with the CAMPO Transportation Plan.

NOW THEREFORE BE IT RESOLVED by the Policy Board of the Columbus Area Metropolitan Planning Organization that the presented Transportation Improvement Program for State Fiscal Years 2016 thru 2019 is hereby accepted and adopted.

Approved this 30th day of March 2015

Zack Ellison, Chair

Elizabeth Fizel, Interim CAMPO Director

Acronyms

Terms & Acronyms	Long Version	Explanation
3C Planning	Continuous, cooperative and comprehensive planning	Favorite buzzwords describing the MPO planning process
5303 funds	Planning funds for transit planning	Similar to PL funds, second funding source for MPOs
5307 funds	FTA funding source for transit (bus) operations	
5309 funds	FTA funding source for transit capital needs	
ACO	Acronym Control Officer	
BR\$	Bridge Dollars	Federal funding source for bridge work
CAMPO	Columbus Area Metropolitan Planning Organization	
CAP	Cost Allocation Plan	Document showing how federal PL funds will be spent.
CE	Construction Engineering	Checks and oversight work of engineering firms during construction phase
CFY	City Fiscal Year	
CN	Construction	Acronym used to describe TIP project phases
DES#	Designation Number	INDOTs numbering system for projects
FFY	Federal Fiscal Year	
FHWA	Federal Highway Administration	
FTA	Federal Transit Administration	
GIS	Geographic Information System	
Group II	Funding for use within urbanized area	
Group III	Source for funds prior to MPO - competitive	
Group IV	Source for funds within MPA outside of urbanized area	
HPMS	Highway Performance Monitoring System	
INDOT	Indiana Department of Transportation	
INSTIP	Indiana State Transportation Improvement Program	The State's version of our TIP
ISTEA	Intermodal Surface Transportation Efficiency Act	
ITS	Intelligent Transportation System	
LRTP	Long Range Transportation Plan	
MOU	Memorandum of Understanding	
MPA	Metropolitan Planning Area	
MPO	Metropolitan Planning Organization	
PE	Preliminary Engineering	Acronym used to describe TIP project phases
PL	Planning Funds	1% of the STP funds are PL funds, funding source for MPOs
RFB	Request for Bid	
RFP	Request for Proposal	
RFQ	Request for Qualification	
RW	Right of Way	Land acquisition phase of projects
SFY	State Fiscal Year	

SOW	Statement of Work	
STP	Surface Transportation Program	Largest source of funds for road projects (80 / 20 match)
TE	Transportation Enhancement	Funds for trails, beautification, etc. (enhances!!)
TIP	Transportation Improvement Program	List of street / trail / transit projects (3 year horizon)
UZA	Urbanized Area	As defined by the US Census
VMT	Vehicle miles traveled	

Columbus Area Metropolitan Planning Organization
