### **RE: Columbus Roundabout Landscape Proposal**

As per verbal discussions, locating the hybrid hackberry trees and Kentucky Coffee trees in the quantities indicated on the plan is proving to be a challenge. I believe we can locate all or most of the needed trees if some size variation is acceptable.

Jackson's Nursery estimates an installed price allowance of \$55,000 plus or minus 5% should be allowed. This would include fertilizing, mulching, staking, and warranty for one year. No sales tax has been included.

This bid is based on the assumption that machine digging is acceptable. Any damage to irrigation or other underground utilities not located shall be the responsibility of others.

We welcome the opportunity to work with you on this project. If this design proves totally unacceptable, we would be interested in helping develop a new design.

Best regards,

Carl Jackson
