RE: Student Housing Sidewalks

Columbus Redevelopment Commission,

The Columbus Board of Aviation Commissioners (BOAC) respectfully requests approval for the use of Airport TIF dollars for the installation of sidewalks around the student housing development, The Annex of Columbus, and a connection to the higher education institutes.

The Plans were developed by the City of Columbus Engineering Department and were bid. The successful low bidder was Excavation Plus, Inc. for \$97,492.00.

The installation of the sidewalk is required per the Columbus Airport Planned Unit Development (PUD), and is the obligation of the Airport to install.

Thank you for your time and consideration,

Caleb Tennis

President

Columbus Board of Aviation Commissioners
