Help Kids in our Community with a Donation to the Chuck Wilt Youth Scholarship Program

Created in 1988 and renamed in honor of Chuck Wilt, long-time Director of the Columbus Parks and Recreation Department, the Chuck Wilt Youth Scholarship Program awarded over \$17,000.00 in scholarships in 2013. Each year, the Fund allows families who qualify to request up to \$105.00 per child to choose up to three Parks & Recreation activities. Based on financial need, this program allows children to have the same experiences as their peers, experiences that can help to identify their talents, teach them new skills, build their self-esteem, stay active and more.

By contributing to the Chuck Wilt Scholarship Program you can give children an opportunity to have the Parks & Recreation experience. Contribute online at www.columbusparkfoundation.org or mail your donation to the Columbus Park Foundation at the address below. Partners like You help give every child a chance to have fun and enjoy the benefits of being active through Parks and Recreation!

Enjoy Columbus' Living Room: Visit The Commons!

Miller-Tangeman Lobby Featuring Chaos I

Chaos I is a 7-ton, kinetic sculpture by Swiss artist Jean Tinguely (1925-1991). The 30-foot high piece is the largest work by Tinguely in the United States. Columbus, Indiana, a city known for both its great architectural designs and its world-class manufacturing operations, is proud to be home to a sculpture that successfully marries art and engineering.

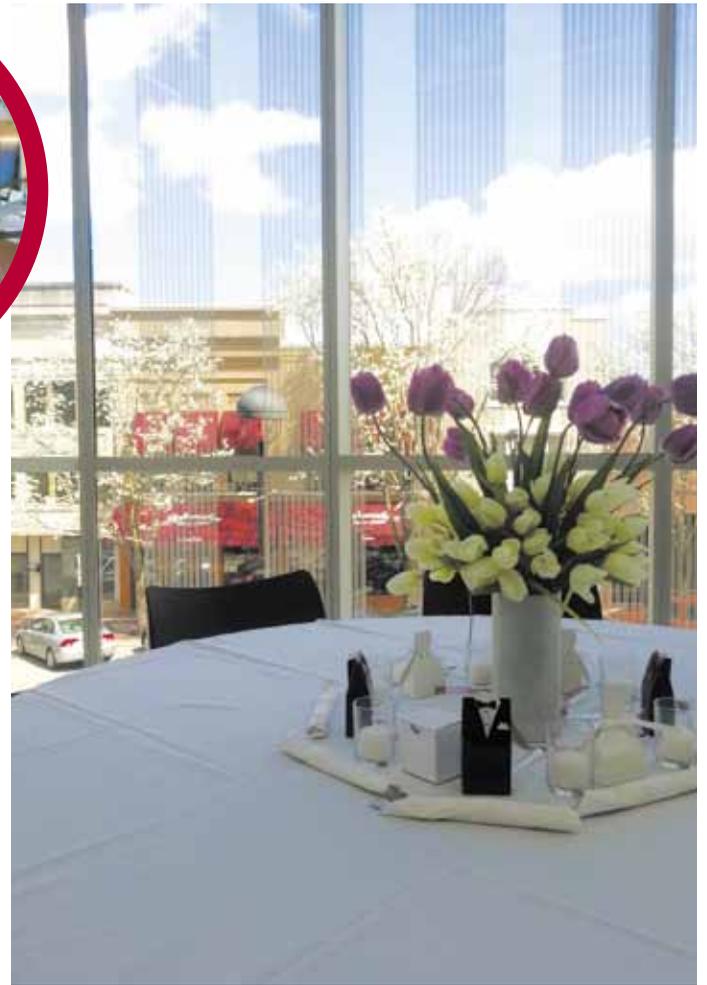

Chaos I cycles through a series of motions to simulate a day in a life, beginning slowly at first, adding movements and then winding down again. At the peak of its chaotic movements, steel balls roll and crash through a caged track, catching the attention of all ages.

Types of Paths:

Multi-use paths

Multi-use paths are intended to provide uninterrupted or minimally interrupted movement over distances of a mile or more for a variety of purposes and users, such as cyclists, joggers and pedestrians.

Sidewalks

A sidewalk is an extra-wide sidewalk along one side of a street within the street right-of-way. Sidewalks are designed to carry both pedestrian and bicycle traffic. Sidewalks have an advantage over bicycle lanes by having a curb separating the vehicle and bicycle traffic.

Sidewalks

Sidewalks are intended to be located in the street rights-of-way to connect pedestrians to their homes and destinations. The distance traveled by a pedestrian on a local sidewalk is expected to be less than one mile.

Connectors

Connectors provide pedestrian access from cul-de-sac streets and other subdivision streets to nearby sidewalks, multi-use paths, and other bicycle and pedestrian facilities. They also provide access to key destinations, such as schools and parks.

Bicycle routes

Bicycle routes are streets that have been designated and marked with signage as bicycle routes. Local streets are particularly well suited for bicycle routes.

Bicycle lanes

Bicycle lanes are designated areas of the street which are reserved for the exclusive use by bicyclists. They are typically established with pavement markings and signs along routes.

Crosswalks

Intersection and crossing measures that have been or are being used in Columbus include marked crosswalks, pedestrian crossing warning signs, curb extensions, flashing beacons, school crossing guards and countdown timers and pedestrian signals.

Sharrows

Shared lane markings or "Sharrows" are street markings placed on city streets to inform bicyclists and motorists where a travel lane is shared by both.

Trail heads

Trail heads are most appropriately located at places where people change modes of transportation - exiting their vehicles to begin a walk, jog or bicycle ride. Trail heads should provide access to the People trails and act as identification markers.

Join the "Movement" and become a Friend of the People Trail. To be a part of further expansion and development of our People Trail network go to ColumbusParkFoundation.org.
